

dbFX

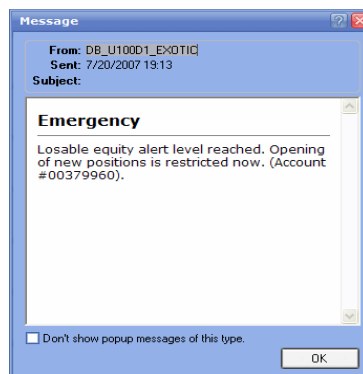

A Passion to Perform.

Deutsche Bank

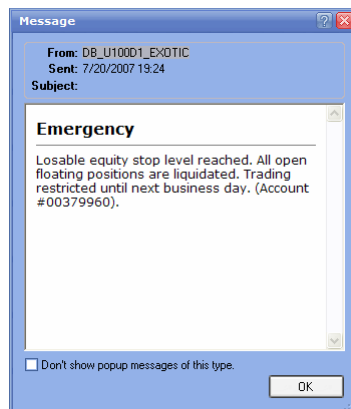

dbFX Equity Alert / Stop Feature

The **EQUITY ALERT** feature will restrict trading once a predetermined daily loss amount is reached. The account will be restricted from opening new positions but not restricted from closing positions. The restriction will remain until the end of the trading session.

The **EQUITY STOP** feature will automatically liquidate all open positions once a predetermined daily loss is reached. The equity stop will work similar to a margin closeout. Trading will still be restricted until the end of the trading day.

NOTE: If the opening of a position will cause the daily loss to exceed the predetermined equity alert amount the trade will be rejected.

To remove the trading restriction before the end of the trading session, the client can call the help desk to have the account reset.
